

COLORADO

COLORADO BLVD

MULTIMODAL IMPROVEMENTS PROJECT

WELCOME!

PURPOSE & NEED

PREVIOUS STUDY

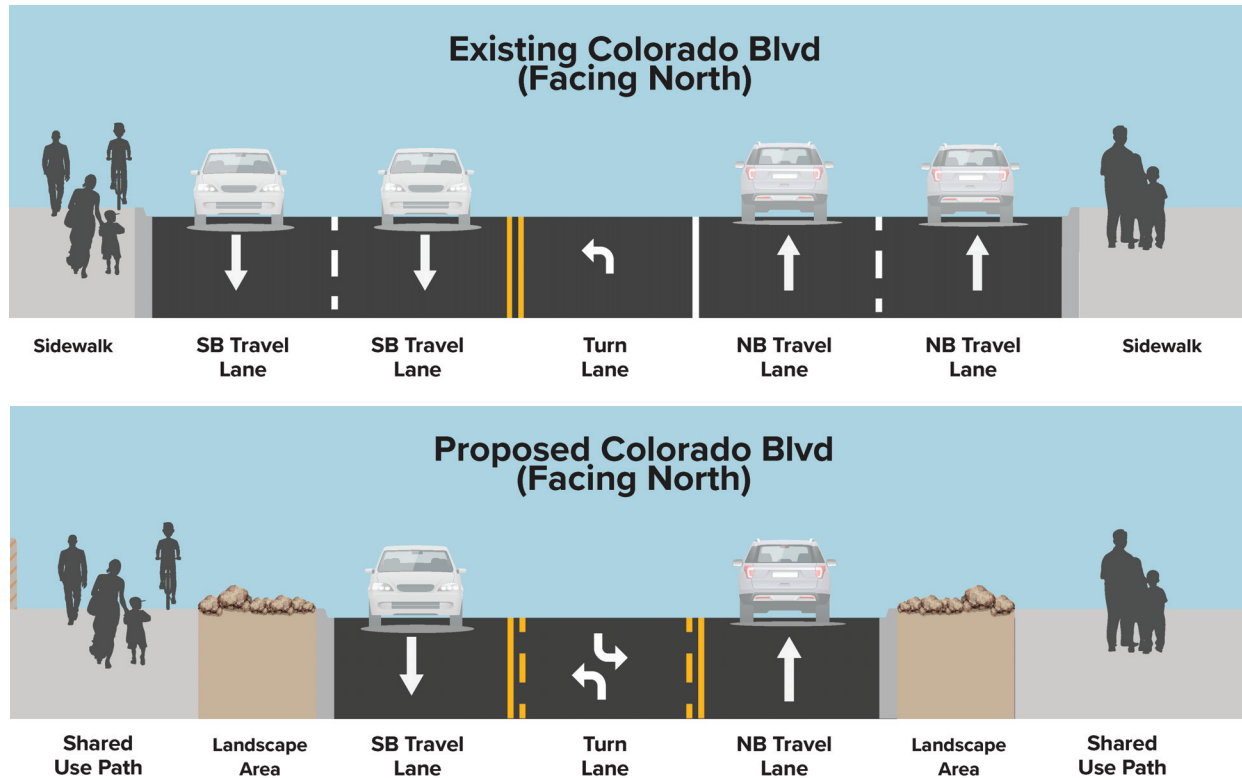

In June 2021, the City of Centennial adopted the - Colorado Boulevard Multimodal Corridor Study to enhance safety and accessibility for all types of transportation. The goal was to identify, evaluate and select multimodal alternatives for the Colorado Boulevard corridor for inclusion in the City of Centennial's Transportation Master Plan.

ARAPAHOE ROAD TO DRY CREEK ROAD

This project focuses on a 1-mile segment of Colorado Boulevard between Arapahoe Road and Dry Creek Road. These updates include lane reductions and enhancements to bicycle and pedestrian facilities, aimed at creating safer and more efficient travel for everyone—whether walking, biking, or driving.

CORRIDOR FEATURES

EXISTING AND FUTURE CROSS SECTIONS

EXISTING TRAFFIC DATA

55

CRASHES
2014-2018 crash data

At least **one** involved a pedestrian.
One crash resulted in a fatality at Geddes Avenue.
Two crashes resulted in injuries at Geddes Avenue and Arapahoe Road.

Posted Speed Limit

**SPEED
LIMIT
40**

Actual Speeds

**42 to
51 MPH**

Average Daily Traffic

11,400

Vehicles Per day

PRIORITIZE ISSUES

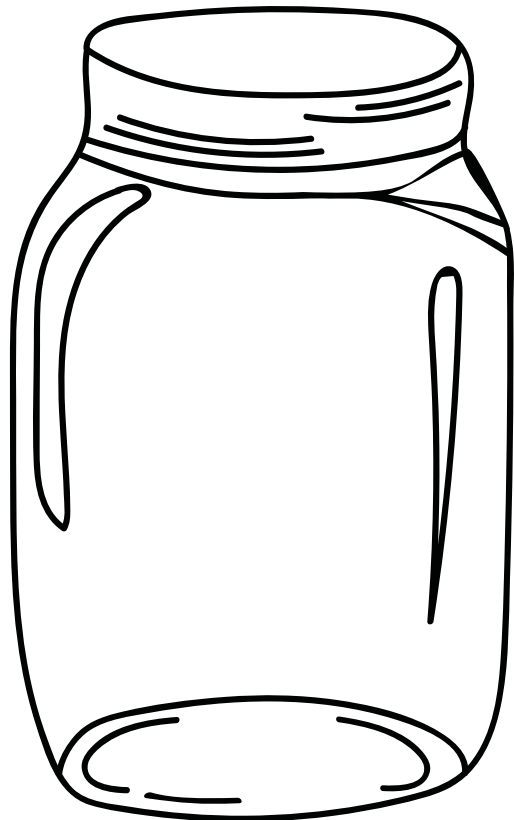

DIRECTIONS

The following project goals are all important - **how would you rank them?** Place dots on the project goals that are most important to you, or spread your dots evenly.

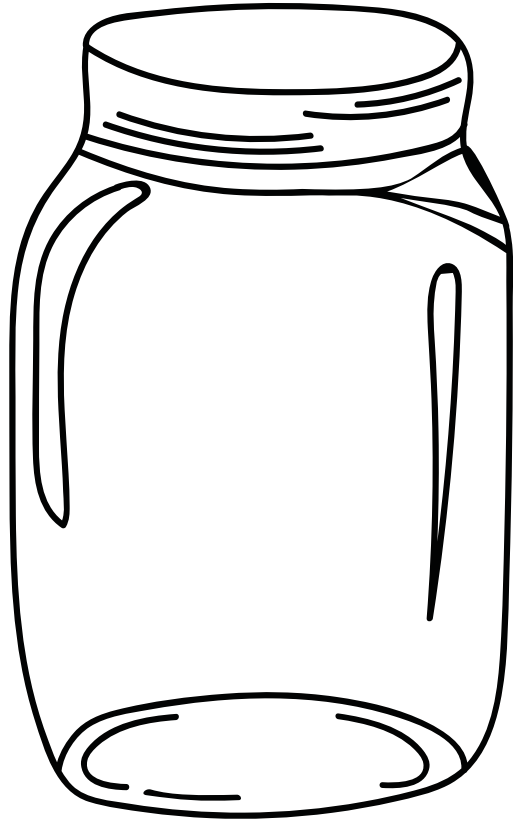

TRAFFIC CALMING

Prioritize slowing vehicle speeds along the corridor.

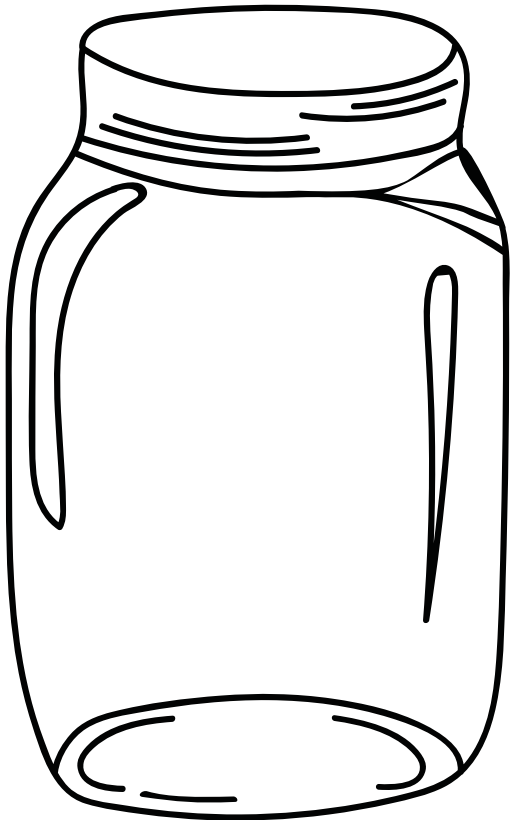

PEDESTRIAN FACILITIES

Prioritize pedestrian mobility along the corridor.

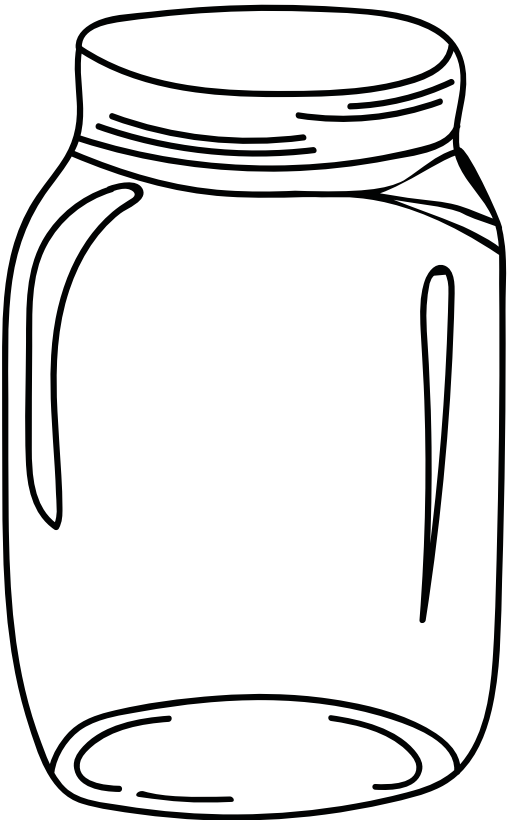

BICYCLE FACILITIES

Prioritize bicycle mobility along the corridor.

CONSTRUCTION PHASING

Minimize disruptions during construction as much as feasible.

NEXT STEPS

FINALIZE DESIGN

Spring 2025 - Winter 2025

PHASE 2 OUTREACH

Sept. 2025 Open House
(Tentative)

ADVERTISE FOR CONSTRUCTION

Winter 2025-2026

CONSTRUCTION BEGINS
